Anna	Cadence	11/16/1981	Female
Gilbert	Grape	1/1/1984	Male

Screening SSO Functionality

This update enables EHR InContext Users to access social needs screening assessment questionnaires via Single Sign-On (SSO). Users can now easily launch the assessment, conduct screenings with patients to identify potential needs, and seamlessly add the assessment to the patient's record at the HIE. It's important to note that this SSO launch functionality is exclusively available to EHR users and is not accessible in the CRISP Portal.

You can learn more about all of CRISP's SDOH data and tools on our SDOH website page.
